

Scientific Writing & Publishing in AYUSH Journals

Turn a research question and evidence trail into a transparent, reviewable manuscript.

Lecture notes

1. Match title, abstract, methods, results and conclusion to the actual study question.
2. Use appropriate reporting guidance and describe methods sufficiently for readers to assess the work.
3. Separate results from interpretation; do not overstate causality or generalisability.
4. Respond to peer review point-by-point, cite evidence and track manuscript changes.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Expected answer
Why should conclusions be narrower than promotional claims?	They must reflect the evidence, methods and limitations of the study.
What makes a peer-review reply effective?	A respectful point-by-point response showing exactly what changed and why.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.

Applied learning record

Use this page after watching the lecture and reading the notes. It can support a discussion with an industry mentor, faculty supervisor or placement-cell reviewer.

Reflection prompt	Your notes
Key concept explained in my own words	
Evidence or record I would create	
Safety, ethics or quality control I would check	
One question for my mentor	
How this relates to an internship or entry-level role
