

Classical Keraleeya Panchakarma Protocols

Understand a supervised workflow for assessing suitability, preparing safely and recording response.

Lecture notes

1. Assessment comes first: history, indication, contraindications, current symptoms and informed consent guide any plan.
2. Purvakarma and pradhanakarma require documentation of preparation, materials and patient comfort.
3. Do not reduce classical care to a checklist: clinical judgement and supervisor oversight are essential.
4. Record observable response, adverse symptoms, escalation and follow-up rather than retrospective assumptions.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Expected answer
Why is contraindication screening essential?	It prevents unsuitable procedures and ensures timely referral or modification.
What belongs in the session record?	Preparation, observed response, counselling, any concern and the supervising clinician decision.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.
