

AYUSH Manufacturing Practices & Regulatory Compliance

Follow the evidence trail that connects materials, process controls and product release.

Lecture notes

1. GMP is a quality system, not a final inspection alone.
2. Approved specifications define what materials and finished product must meet.
3. Batch records capture who did what, when, with which equipment and what checks were passed.
4. Deviations, out-of-specification results and complaints need documented investigation, corrective action and review before release.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Expected answer
What does a batch record demonstrate?	That a specific batch followed the approved process with traceable checks.
What is CAPA used for?	To correct a problem and prevent recurrence through documented action.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.

Applied learning record

Use this page after watching the lecture and reading the notes. It can support a discussion with an industry mentor, faculty supervisor or placement-cell reviewer.

Reflection prompt	Your notes
Key concept explained in my own words	
Evidence or record I would create	
Safety, ethics or quality control I would check	
One question for my mentor	
How this relates to an internship or entry-level role
