

International Export Compliance & Herbal Dossier Writing

Organise product evidence so a regulatory or partner review can follow the claim-to-proof chain.

Lecture notes

1. Begin with the destination market: product category, permitted claims, labelling language and evidence expectations differ.
2. A dossier links identity, composition, quality specifications, safety evidence, stability and labels through controlled versions.
3. Claims must be proportionate to the evidence and never exceed approved product status.
4. Keep a submission checklist, version history and named owner for each document.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Correct answer
Why is version control important in a dossier?	It prevents obsolete or inconsistent information from being submitted.
What should determine a product claim?	The legal category and the evidence available for that market.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.

Applied learning record

Use this page after watching the lecture and reading the notes. It can support a discussion with an industry mentor, faculty supervisor or placement-cell reviewer.
