

Pulse Diagnosis & Ashtavidha Pariksha

Practise recording observations consistently and separating findings from interpretation.

Lecture notes

1. A structured examination starts with a respectful setting, consent and a clear purpose.
2. Record what is observed or elicited before assigning meaning; avoid presenting a learning exercise as a definitive diagnosis.
3. Use consistent terminology, time, context and relevant associated findings.
4. Escalate uncertain, serious or out-of-scope findings to a qualified supervisor or clinician.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Expected answer
What is the difference between a finding and an interpretation?	A finding is what was observed; interpretation is the clinical meaning assigned after evaluation.
When should a learner escalate?	When there are red flags, uncertainty or work beyond their authorised competence.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.
