

Holistic Patient Counseling & Integrative Communication

Build a clear, respectful conversation that supports informed, realistic next steps.

Lecture notes

1. Start with the person's concern and ask open questions before giving information.
2. Use plain language, check understanding with teach-back and avoid unsupported promises.
3. Agree on a small, feasible next step and document preferences, questions and follow-up.
4. Respect privacy, culture and autonomy; refer when a concern needs clinical assessment.

Watch with purpose

While watching the YouTube lecture, pause at each workflow decision. In your notes, identify: (a) the evidence needed before acting, (b) the safety, ethics or quality control, and (c) the record that proves the step occurred.

Knowledge check

Question	Correct answer
What is teach-back?	Asking the person to explain the plan in their own words to confirm understanding.
Why document patient preferences?	It supports continuity, shared decisions and respectful follow-up.

Practice MCQs

1. Which choice best supports reliable professional practice?
A. Relying on memory after the session B. Recording approved checks and escalating deviations C. Skipping documentation when busy D. Changing findings after review
2. What should guide an action in a supervised learning workflow?
A. A generic online claim B. The approved process, evidence and appropriate oversight C. A marketing target D. An assumption about the case

Answer key: 1-B and 2-B. The course emphasises evidence, transparent records and appropriate supervision.

Applied learning record

Use this page after watching the lecture and reading the notes. It can support a discussion with an industry mentor, faculty supervisor or placement-cell reviewer.
